

## Programme Contaminated land and extreme weather conditions

**10.00 Registration and refreshments**

**10.30 Chairman's introduction**

Mike Ellis, British Geological Survey

**10.45 Contaminated land: hidden, forgotten or unknown with regard to our changing climate**

Briony Turner, UKCIP and Joanne Kwan, CIRIA

**11.15 A client's point of view – what is the real impact?**

Oliver Lancaster, Wales & West Utilities Ltd

**11.40 A consultant's point of view on flooding and contaminated land**

Chris Meakin, WorleyParsons

**12.05 Refreshments and networking**

**12.20 A regulator's point of view**

Trevor Howard, Environment Agency

**12.45 Panel discussion and questions**

**13.15 Lunch**

**14.15 Workshops**

The aim is to explore challenges and our knowledge gaps for the following issues:

- impact on land contamination by rising ground water
- impact on the effectiveness of the chosen remediation process (including previous projects)
- practical issues eg impact on project programme and site health and safety

**15.15 Refreshments and networking**

**15.35 Reporting**

**16.10 The way forward and close**

## Forthcoming events

**Risk assessment for contaminated land a 2015 update**, 1 July 2015, York

**Asbestos from soil – quantitative risk assessment**, 8 September 2015, London

**Asbestos from soil - remediation**, 10 November 2015, Birmingham
